DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities:

“Resonator **82**” (page 9, line 23) should be Resonator --80--.

Reference number 80a (page 10, lines 14 and 15) does not appear in the drawings with respect to Figs. 7a and 8a where only Fig. 9a show resonator 80a.

Appropriate correction is required.

Claim Objections

The claims are objected to because of the following informalities: None of the claims are identified by a claim number (see corresponding WO publication 01/92292 A2).

Appropriate correction is required.

Allowable Subject Matter

Claims are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Farmer et al. shows a CATV circuit comprising a VSB unit (10), the VSB unit comprising a preemphasis bandpass filter (68) which comprises series and shunt resonant filters but does not teach or suggest where filters of the preemphasis filter comprise an isolation resonator. Farmer et al. further fails to show an isolation resistor coupled between the second resonator and the port (with respect to the first resonator), nor would it be obvious to combine the prior art thus the claims are allowable.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Farmer et al. shows a system for CATV signals.
